

复旦大学数学科学学院 数学综合报告会

报告题目: **Rigidity of Isometric Embedding into the Lightcone**

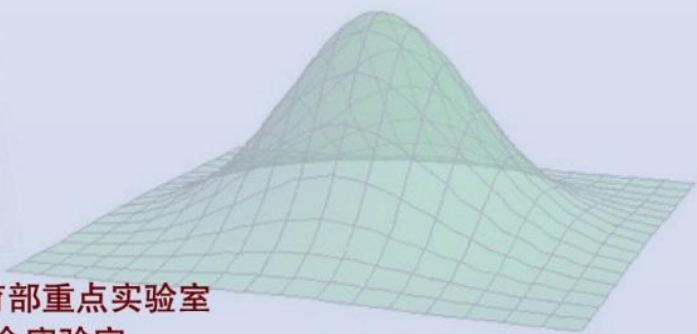

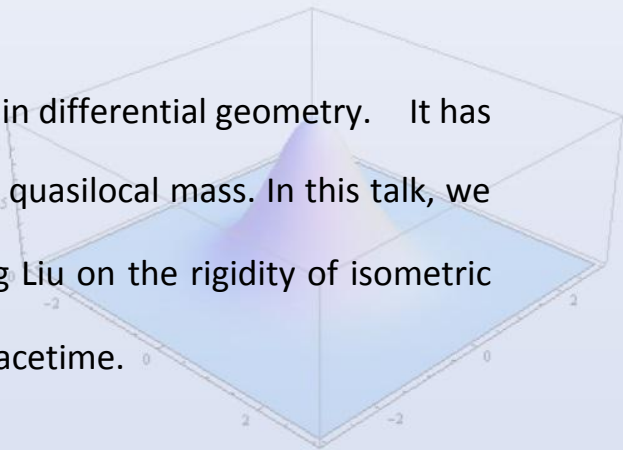

报告人: 余成杰 教授

(汕头大学)

报告时间: 2017-11-30 星期四 9:00-10:00

报告地点: 光华东主楼 1801

摘要: Isometric embedding is a classical subject in differential geometry. It has also important relations with General Relativity on quasilocal mass. In this talk, we will present a recent work joint with Dr. Jian-Liang Liu on the rigidity of isometric embedding into the light cone of the Minkowski spacetime.
