

复旦大学数学科学学院 数学综合报告会

报告题目: **Surplus Allocation using Coherent Utility Functions**

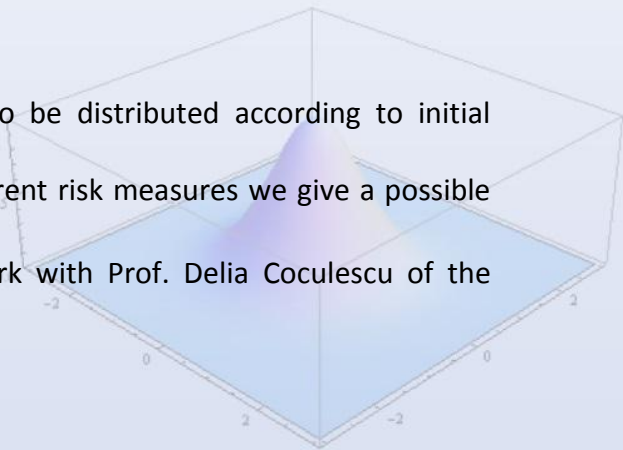

报告人: Professor Freddy Delbaen

(瑞士联邦工学院 ETH)

报告时间: 2017-09-07 星期四 10:00-11:00

报告地点: 光华东主楼 1501

摘要: The surplus of an insurance business needs to be distributed according to initial investment, premiums paid and risk bearing. Using coherent risk measures we give a possible solution in different insurance models. This is joint work with Prof. Delia Coculescu of the University of Zurich.
